

Tubing and Hose Products

Ohio Valley Industrial Services has all of the tubing and hose products you need to complete your gas or liquid system.

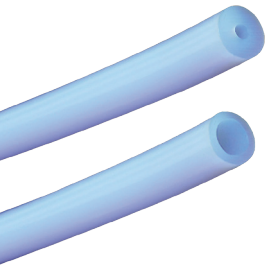

Metal Tubing

- Stainless Steel
- Carbon Steel
- Copper
- Exotic Alloys
- Sanitary

Thermoplastic

- Polyethylene
- Nylon
- Polypropylene
- Polyurethane
- Fluoropolymer
- Clear Vinyl

Teflon Tubing

- PTFE
- PFA
- FEP

Bundled Tubing (Multitube)

- Stainless Steel, plastic, aluminum, copper
- Insulated and/or heat traced
- Armored or jacketed tubing

Hose Assemblies

- Stainless steel wire braid and teflon hose assemblies available for next day delivery
- Push-lok synthetic rubber hose for air or water service
- Fast-Stor hose

Precision Instrumentation Components for Process and Control Systems

The key components in building a leak-free and reliable tube system are proper selection and installation of tubing and hose.

Tubing offers superior advantages over pipe.

- Bending quality
- Less turbulence
- Fewer fittings
- Economy of space
- Less maintenance
- Easier assembly and disassembly
- Greater strength
- Flexibility
- Tighter joints
- Better appearance
- Cleaner fabrication

Ohio Valley Industrial Services is able to provide a full line of tubing and hose, including everything from stainless steel, copper, and carbon steel, to steam and electric traced. We can also provide all accessories that complement tubing and hose. The tubing is available from our warehouse stock.

Safety seminars are available to educate plant personnel on proper tube line fabrication and tube assembly procedures.
